Lecture Information**Course Objectives**

Monetary economics investigates the relationship between real economic variables at the aggregate level-such as real output, real rates of interest, employment and real exchange rates-and nominal variables-such as the inflation rate, nominal interest rates, nominal exchange rates and the supply of money. So defend, monetary economics has considerable overlap with macroeconomics more generally and these two fields have to a large degree shared a common history over most of the past 50 years. This lecture would be provide theories on monetary economics with empirical results following mostly macroeconomic literature.

Related Diploma Policy**Keyword****Media Class (Online Course)****Attainment Target**

Based on the text book, we will learn monetary economics based on macroeconomics with empirical evid

ence. The latter half will be dedicated reading papers in turn.

Grading Criteria

Course Description

Based on the text book, we will learn monetary economics based on macroeconomics with empirical evidence. The latter half will be dedicated reading papers in turn.

Course Contents

Lesson 1 Guidance

Lesson 2 Two-Period Model (1)

Lesson 3 Two-Period Model (2)

Lesson 4 Classical Monetary Model (1)

Lesson 5 Classical Monetary Model (2)

Lesson 6 New Keynesian Model (1)

Lesson 7 New Keynesian Model (2)

Lesson 8 Welfare Analysis

Lesson 9 Midterm Examination

Lessons 10 to 15 Reading Papers in Turn

Students will be assigned one paper to present its summary on Lessons 12 to 15. Reading lists will be shown after the Midterm Examination and students choose one paper from the lists following his/her preferences.

Preparation and Review

Grading Categories and Weight

Presentation at Lessons 10 to 15 (1/3), Midterm Examination (1/3) and Regular Examination (1/3)

Text Book

Obstfeld, Maurice and Kenneth Rogoff (1996), "Foundations of International Macroeconomics," The MIT Press. ISBN0-262-15047-6

Gali, Jordi (2008), "Monetary Policy, Inflation and the Business Cycle: An Introduction to the New Keynesian Framework," Princeton University Press. ISBN978-0-691-13316-4

Reference Book

Woodford, Michael (2003), "Interest and Prices," Princeton University Press. ISBN0-691-01049-8

Prerequisite

Students should complete Macroeconomics with good score.

Notice for Students

Students should choose their class carefully following their research project. Students not writing paper in the field of monetary economics or macroeconomics should not credit. Notice that this is "S

tandard" monetary economics course in graduate school.

Message to Students

Nothing in particular.

Lecture Information**Course Objectives**

This course provides students with an understanding of the economics of environmental management, and with the ability to analyze key issues in this field using standard tools of theoretical and empirical economic analysis.

Related Diploma Policy**Keyword****Media Class (Online Course)****Attainment Target**

At the end of the course, students should:

1. have an understanding of the economic theory relating to:
 - the nature of environmental and resource problems; and
 - the choice of policy tools for environmental and resource management;
2. be able to analyze a range of current environmental policy issues; and
3. have the ability to read and interpret academic papers in relating issues.

Grading Criteria

Course Description

There are 15 lectures with a final exam at the end of the term. Topics to be covered are listed below.

Course Contents

1. Economy-environment interactions
- 2-3. Fundamentals of environmental and resource economics: Externality, Commons, Public goods
- 4-7. Environmental policy tools: Command and control, Voluntary agreement, Tax, Subsidy, Emissions trading
- 8-9. Presentation and Discussion
- 10-13. Environmental policy analysis: Waste management, Transportation, Global warming, R&D and Innovation, etc.
- 14-15. Presentation and Discussion

Preparation and Review

Follow the coursework requirements below.

Grading Categories and Weight

Assessment is based on the following coursework requirements (50%) plus a final exam (50%):

1. Write referee reports from a specified list of readings on the topics covered by the course, which will be provided at the first class; and
2. Presentations and discussions based on the readings and lectures.

Note: The coursework is compulsory. Students should note that if they do not complete the coursework requirements, and do not attend the classes, they may not be permitted to proceed to the final exam.

Text Book

- Nick Hanley, Jason F. Shogren, and Ben White, 2007, *Environmental Economics: In Theory & Practice*, 2nd edition, Palgrave Macmillan; 2nd edition.
- 有村俊秀, 片山東, 松本茂, 2017, *環境経済学のフロンティア*, 日本評論社 (in Japanese).
- 細田衛士 (編著), 2012, *環境経済学*, ミネルヴァ書房 (in Japanese).

Additional materials will be provided in a reading list.

Reference Book

Recommended pre-class readings (undergraduate-level micro economics, econometrics, and environmental economics, respectively) are the following:

- [MICRO] Varian H.R., 2010, *Intermediate Microeconomics: Modern Approach*; 8th International student edition.
- [MICRO] 神取道宏, 1999, *ミクロ経済学の力* (in Japanese).
- [METRICS] Wooldridge, J.M., 2013 *Introductory Econometrics*; 5th International edition.
- [METRICS] 伊藤公一朗, 2017, *データ分析の力 因果関係に迫る思考法*, 光文社 (in Japanese).
- [METRICS] 中室牧子, 津川友介, 2017, *原因と結果の経済学*, ダイヤモンド社 (in Japanese).
- [ENVECON] Field, B.C. and M.K. Field, 2012, *Environmental Economics: An Introduction*; 6th international edition.
- [ENVECON] 日引聡, 有村俊秀, 2002, *入門環境経済学 環境問題解決へのアプローチ* (in Japanese).

Prerequisite

Students are expected to have prior knowledge of undergraduate-level micro economics and econometrics.

Notice for Students

* Lectures and lecture notes will be provided in either English, Japanese, or both, depending on the needs of registered students.

* Required readings include both English and Japanese materials.

Lecture Information**Course Objectives**

The aim of this course is to understand basic concept of empirical finance.
In this course, I provide the empirical methods using of STATA.

Related Diploma Policy

Knowledge

Keyword

Finance, Empirical Finance

Media Class (Online Course)**Attainment Target**

The goal of student(s) in this course is to understand the introductory topics of empirical finance.

Grading Criteria

S : To understand the fundamental knowledge of empirical finance and explain their understanding to others.
A : To understand the fundamental knowledge of empirical finance and manage to explain their understanding to others.
B : To understand the fundamental knowledge of empirical finance .

C : To understand basic knowledge of empirical finance .

Course Description

Attendees are expected to learn how to analyze their data by using STATA.

Course Contents

- 1 Introduction
2. Literature Review of Empirical Finance
3. Data analysis (using STATA)

Preparation and Review

I recommend students to subscribe to the newspaper which reports the Financial phenomena. To know news on Japanese markets, "Nikkei" is preferable. To know world news, prestigious newspaper such as "The Wall Street Journal" or "The Financial Times" is recommended.

Grading Categories and Weight

Attendance and present your opinion in the class.

Attendance (40%); Presentation (60%);

Text Book

Reading assignments are distributed during the course.

Reference Book

Prerequisite

Student(s) are required to have interests in Empirical Finance.

Notice for Students

Attendance at every class is considered important. Please do not delay the class.

Message to Students

The announcements and materials in the course will be distributed through Live Campus. Students had better check for announcements and materials before each class.
